# Nuestra Empresa

**Aluminios de Colombia S.A. (Alucol S.A.)** fue fundada en 1993. Está ubicada estratégicamente al norte de Suramérica, en el corazón de Colombia. Se ha convertido en una de las principales empresas manufactureras del sector del aluminio en el país ofreciendo una amplia gama de productos de perfiles de aluminio arquitectónico, desarrollados con tecnología avanzada, excelente calidad, y a precios altamente competitivos a nivel nacional e internacional.

La diversidad en el mundo de la construcción, exige nuevos diseños, tecnología, formas y materiales que logren mayor adaptabilidad en el mercado del aluminio, permitiendo así, utilizar productos livianos pero con igual o mayor resistencia a los convencionales; en **Alucol S.A.** contamos con nuestros propios proceso de fundición, extrusión, pintura electroestática y anodizado, lo cual nos permite brindarle opciones en el aluminio arquitectónico, facilitando el cumplimiento de sus necesidades, ya sea en la construcción, comercio, industria, decoración y/o transporte.

La experiencia adquirida por nuestro personal en la fabricación y comercialización de los productos de aluminio, nos ha permitido ofrecer soluciones adecuadas y de valor agregado a nuestros clientes, generando reconocimiento en el mercado. Proyectamos, por tanto, un futuro consistente y coherente con los objetivos organizacionales para beneficio de nuestros aliados de negocios.

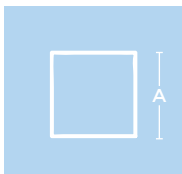

## ÁNGULOS

Unidad: mm

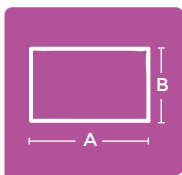

REF	A	B	C
